Hiring Manager,

tether

10 July 2025

Dear Concern,

I am writing to express my keen interest in the Graphic Designer position. With a strong foundation in Computer Science combined with a passion for creative design, AI-generated content, and visual storytelling, I am eager for the opportunity to contribute to your team.

I hold a Diploma in Computer Science and Engineering from Khulna City Polytechnic Institute, Bangladesh, where I gained a robust understanding of software engineering principles, data structures, algorithms, and web development. Complementing my technical skills, my experience as a Graphic Designer Intern at Graphic Solution, Bangladesh, enabled me to hone my creative design capabilities, particularly in UI/UX design, branding, animation, and content creation.

My proficiency extends to industry-standard tools such as Adobe Photoshop, Illustrator, Canva, Figma, and DaVinci Resolve, along with AI content creation platforms like Midjourney, Runway, OpenArt, and ChatGPT. Additionally, I possess programming expertise in Java, Python, JavaScript, and C#, and I am adept with frameworks such as Node.js and Bootstrap, further enhancing my versatility as a designer who understands both aesthetics and functional technical implementation.

I am passionate about leveraging my diverse skill set to deliver visually compelling and technically sound design solutions. My goal is always to create content that not only meets aesthetic standards but also engages users and supports clear communication objectives.

Thank you very much for considering my application. I look forward to the possibility of contributing positively to your team and am excited to discuss how my skills and enthusiasm align with your organization's vision.

Nafiul Islam
